DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Shimizu et al. (US 2002/0127433).

Regarding claims 1-3 and 6, Shimizu teaches a magnetic recording medium and a method thereof comprising a substrate, a perpendicular magnetic layer, and a plurality of soft magnetic layers (Abstract), wherein the soft magnetic layer has a total thickness of less than 40 nm [0019], a magnetic anisotropy in a surface direction or radial direction of the substrate [0080], and a $B_s \cdot H_c$ of $6320 \text{ T} \cdot \text{A/m}$ (0.4 T times $15.8 \times 10^3 \text{ A/m}$) [0054].

Regarding claim 4, Shimizu teaches a hard magnetic layer, which suppresses a magnetic wall formation in the soft magnetic layer, is disposed between the substrate and the soft magnetic layer [0061].

Regarding claim 5, Shimizu teaches that the hard magnetic layer has an in-plane magnetic anisotropy [0061], which is magnetized in a direction substantially parallel to the direction of the magnetic anisotropy of the soft magnetic layer.

Regarding claim 7, Shimizu teaches a magnetic reading-writing apparatus comprising the magnetic recording medium as set forth above, (Fig. 2), and a magnetic head for recording and

reproducing information to the magnetic recording medium, wherein the magnetic head is a single magnetic pole head [0048].
